

# Horseshoe Crab Craft!

## Materials

- Construction paper
- Horseshoe Crab Template
- Tape or glue
- Marker or paint
- Scissors

## How to Make It!

1. Print out the horseshoe crab template.
2. Color or paint the two outlined pieces – OR – you can also cut the shapes out and trace them onto colored construction paper, as seen in the video.
3. Once you have the two pieces cut out, cut along the dotted line seen in the template (where it says “CUT”)
4. Now, find the “X” on both halves of the template – you are going to fold the corner you cut over to this point, as seen in the video.
5. Use two small pieces of tape to secure.
6. Attach the other piece on the underside of the front piece with another piece of tape.
7. Enjoy your creation!
